

Andrew Pembroke used to work in insurance in London. He likes eating Italian food like pizza and pasta! Andrew really likes his job as a Governor. We asked him why he came here when he first became a Governor and he replied; "I was invited by another Governor who thought it would be good for me to share my skills with your school". He later explained that whilst working he became

very good at making decisions. We found it interesting that Andrew used to work in London but had now chosen to become a Governor. He said that he found it tricky at first.

The next question we asked him was what he did as a School Governor. We were surprised to learn that one of his main jobs is keeping us safe. Andrew said he likes asking the teachers if they are doing alright and checking on them. He also said he likes to check on the students making sure they are safe and the building is secure.

Very importantly, Andrew is trying to raise loads of money for the new school.

One area we are interested in is the Gym. A lot of the students in SG5 can't wait until the new Gym opens.

INTERVIEW WITH ANDREW

WRITTEN BY LIAM, JACK AND SAPPHIRE

We all want to go in there and use the new equipment, hopefully bought using the money Andrew and we will be raising. Unfortunately we are a little sad that the gym is a bit smaller than we thought but we understand there isn't much space. It is important to look after the Gym and take turns so everybody gets a go!

Through Mini Enterprise, students in SG5 are trying to raise money to make the new school safe and better. It is really good that Andrew is also raising money!

Everyone is excited about having the new Life Skills house. Andrew commented that we can all learn how to safely look after a home.

The school is going to be bigger. Now there are 100 students in the school, and it is going to be 180 students in the new school! We did wonder how it would work managing the extra students - extra staff will be needed...
