

Northfleet School for Girls

LEARN • ENJOY • ASPIRE • PROGRESS

THREE
YEAR VISION

2018 - 2021

Our aim is to help every young person to Dream Big and Achieve through:

- High expectations
- Working together
- Enjoying the journey

"We prepare students for success, not just through exam results but also developing life skills such as confidence, resilience and team working."

High expectations will be evident through:

- Students achieving progress rates within the top 10% of the country through excellent teaching that challenges and proactive engagement.
- Students enter aspirational careers, supported by the school to achieve this through outstanding results and development of life skills.
- Students aspiring to be the leaders of the future and developing their leadership skills whilst at the school.
- Confident students who trust us to deliver a great education in partnership with their hard work and proactivity.
- Students who take pride in their school, look smart and want to positively contribute to their community.
- Attendance in the top 10% of the country because students want to engage with the school and their learning.
- An inclusive environment where students want to spend time, staff want to work and which provides for the best possible outcomes.

“When I walk into the building I am safe, comfortable and know I want to achieve.”

Working together will be evident through:

- A clear partnership between student, parent and school in achieving excellent outcomes.
- Parents who feel that they are able to actively engage with the school and support us in achieving the best education.
- Strong working relationships with feeder schools, especially those within the Trust, to ensure a smooth and effective start. There will be clear transition of effective teaching between schools.
- Knowing that all students can experience barriers to success and ensuring support is in place to reach the best possible outcomes despite setbacks.
- NSfG will be seen as a proactive contributor to the local community, with a particular focus on students being responsible citizens, engaging with local charities and learning the value of giving.
- Students who engage as leaders of learning within the classroom.
- Students and staff who feel that this is 'their school', that they have a say and are active members in further school improvement.
- Considerable use of Alumni and other inspirational speakers to motivate and encourage students.

“We work as a three-way partnership for the benefit of all”

Enjoy the journey will be evident through:

- A praise culture where all staff and students feel that their efforts and abilities are recognised and wherever possible celebrated.
- A wide range of clubs, trips, visits and experiences which not only enrich the curriculum, but widen horizons and show the exciting possibilities life brings!
- Students who look back on their time at NSfG with fond memories as a school where they developed as a whole person, not just achieving academic qualifications.
- Positive relationships across the school, where there is a culture of building each other up and celebrating our own unique identities.
- Clear evidence that the school recognises the individual talents in all students and encourages them to develop, including extra-curricular activities.
- A culture where students are keen to use the opportunities available to them.
- Staff who enjoy working at NSfG and feel invested in through positive career development.
